ESPN Sports World 2.1 is the official ESPN client for the ESPN Sports World service. ESPN Sports World is a real-time simulation that enables you to live and manage the NFL, NBA, MLB and NHL. With ESPN Sports World, you can keep up with the current standings, follow the next top performances, and manage your team.Q: rails form\_for not working with select\_tag for generic controller I am using the latest version of rails (4.2.6) and ruby (2.2.1). I am using a generic controller "PicturesController" for all different types of pictures (image, video, audio,...). My issue is that I cannot use the select\_tag with the select\_tag helper. This is what I would normally do with a model, but here it does not work: 'show', :id => @picture], :html => { :class => 'form-inline' } do |f| %> true, :onchange => "this.form.submit();" 82157476af
